Free Cost Saving Workshop for Multifamily Housing Owners This Wednesday

PALMDALE – The City of Palmdale, in partnership with The Energy Network, will host a free workshop titled “Cost Effective Improvements to Increase Your Property Value” this Wednesday, May 20 from 9 to 10 am in the Joshua Room of the Chimbole Cultural Center, 38350 Sierra Highway.

The presentation will be led by David Myers, Multifamily Program in Southern California Manager for The Energy Network.

“Come learn how you can use The Energy Network’s Multifamily Program to access rebates and technical consulting for energy upgrades,” said Palmdale’s Housing Coordinator Terri-Lei Wheeler. “Upgrading now can lead to significant utility bill savings, lower operating costs, higher returns on investments, reductions in maintenance, improved building performance and better tenant attraction and retention. Rebates up to \$1,20 per unit are available for multifamily buildings.”

Participants will have the opportunity to ask specific questions about their property and share their perspective.

For more information or to RSVP, please call Jonathan Austin at 949-667-2838.

About The Energy Network

The Energy Network was authorized by the California Public Utilities Commission (CPUC) in 2012 to harness the collective power of residents, businesses, and the public sector to achieve an unprecedented level of energy savings across Southern California.

As part of its core mission, The Energy Network provides resources and assistance to homeowners and property owners who are planning residential energy efficiency upgrades. They do this by providing information and money-saving resources in collaboration with local agencies, governments and stakeholders.

Services include rebate and incentive offerings for qualifying energy efficiency upgrades, attractive financing terms for eligible residential solar and energy saving improvements, tools to help identify contractors with energy efficiency training, and other resources that help homeowners take the next step toward saving energy.

For more information about The Energy Network, please visit www.TheEnergyNetwork.com, email LAmultifamily@builditgreen.org, or call 213/688-0070.
